PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building and deploying production-ready web applications used in real-world environments. Strong expertise in React, Node.js, and TypeScript, with a focus on designing scalable systems, optimising performance, and delivering end-to-end features.

Currently building a production-grade resume analysis platform and integrating AI-driven features to enhance contextual evaluation and user insights. Looking to contribute to high-impact engineering teams where I can build scalable products and grow in modern full-stack and AI-driven development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C, C#

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST API Design, JWT Authentication, RBAC

Databases: PostgreSQL, MongoDB, MySQL

Cloud & DevOps: AWS (EC2, S3), Docker, CI/CD Pipelines, GitHub Actions, Vercel

Other: Prisma ORM, API Design, Unit Testing, System Design Basics

PROFESSIONAL EXPERIENCE

Full Stack Developer · Resume Analysis Platform (Personal Project) *Nov 2025 - present · Australia*

↗ Live Demo | ↗ GitHub

- Built and deployed a production-ready full-stack application that analyses resumes against job descriptions, delivering real-time scoring and feedback to users.
- Designed and implemented backend REST APIs using Node.js and TypeScript to handle resume parsing, keyword matching, and scoring logic.
- Developed a responsive frontend using Next.js, enabling seamless resume uploads and interactive feedback dashboards.
- Integrated Prisma ORM with PostgreSQL, optimising data access and improving query performance.
- Designed system architecture focusing on scalability, maintainability, and real-world usability.
- Currently integrating AI-driven features using LLM-based approaches to improve contextual evaluation and recommendations.

Full Stack Developer · Solve8 IT Services (IT Services Company, Contract) *Jun 2025 – Sep 2025 · Australia*

- Developed and delivered production-ready full-stack features for internal business applications used in daily operations.
- Built and maintained React-based frontend components, improving usability and performance of internal tools.
- Designed and implemented 10+ REST APIs supporting user management and operational workflows.
- Optimised MongoDB queries and backend data access patterns, improving application responsiveness.
- Worked within an existing production codebase, diagnosing and resolving issues to improve system stability

Full Stack Developer · Qual-T Solutions (Industry Client Project, QUT) *Feb 2025 – May 2025 · Brisbane, QLD*

- Built a full-stack service marketplace supporting admin, provider, and customer workflows.
- Developed responsive frontend components and integrated them with backend APIs for seamless user experience.
- Designed and implemented 15+ REST APIs with JWT authentication and role-based access control (RBAC).
- Architected modular backend systems to improve scalability and future feature development.
- Delivered the full product lifecycle from requirements gathering to deployment within a fixed deadline.

Full Stack Developer · Zcientia Labs (AI/SaaS Startup) *May 2023 – Oct 2023 · Remote (India)*

- Developed backend systems for a CV generation SaaS platform handling structured user data and document workflows.
- Improved MongoDB performance by ~25% through schema redesign and indexing optimisation.
- Implemented structured validation and error handling, significantly improving system reliability.

Full Stack Developer · Be-Practical Tech Solutions (EdTech Company, India) *Jan 2022 – Dec 2022 · Bengaluru, India*

- Built a full-stack e-commerce platform including product catalogue, cart, and checkout workflows.
- Developed REST APIs and integrated frontend-backend communication for real-time data flow.
- Implemented JWT-based authentication and secure session management.

PROJECTS

IoT Cloud Monitoring System · *Node.js · AWS · REST APIs*

- Designed and implemented a cloud-based system for real-time IoT data ingestion and monitoring.
- Developed backend APIs to process device telemetry and enable live system tracking via dashboards.
- Deployed on AWS, enabling scalable data handling and remote monitoring capabilities.

Resume Analysis Platform (Live) · *Next.js · Node.js · PostgreSQL*

- Built a production-ready application for analysing resumes and providing real-time feedback.
- Designed backend APIs and interactive frontend dashboard for end-to-end user experience.
- Currently integrating AI-driven features for enhanced contextual evaluation.

EDUCATION

Master of Information Technology *2024 – 2025*

Queensland University of Technology (QUT) · Brisbane, QLD

Bachelor of Technology *2018 – 2022*

M.S. Ramaiah Institute of Applied Sciences · India
