Full Work Rights in Australia | No Sponsorship Required

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building and deploying real-world web applications. I've worked across the stack using React, Node.js, and TypeScript, focusing on building practical features, improving performance, and shipping things end-to-end.

Recently, I built an AI-powered resume tool that analyses resumes against job descriptions and generates more ATS-friendly versions using OpenAI. It started as something I needed for myself and turned into a fully deployed product.

Looking to join a team where I can keep building real products, learn from experienced engineers, and grow in full-stack and AI-driven development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C, C#
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST API Design, JWT Authentication, RBAC
AI & Tools: OpenAI API, Prompt Engineering, LLM Integration
Databases: PostgreSQL, MongoDB, MySQL
Cloud & DevOps: AWS (EC2, S3), Docker, CI/CD Pipelines, GitHub Actions, Vercel
Other: Prisma ORM, API Design, Unit Testing, System Design Basics

PROFESSIONAL EXPERIENCE

Full Stack Developer · AI Resume Copilot (Personal Project) *Nov 2025 – May 2026 · Australia*

↗ Live Demo | ↗ GitHub

- Built a tool to solve the problem of rewriting resumes for every job by automatically comparing resumes with job descriptions and generating more ATS-friendly versions.
- Designed backend APIs using Node.js and TypeScript to handle resume parsing, keyword matching, scoring, and AI-based rewriting.
- Integrated OpenAI to improve resume content based on job requirements while keeping it truthful to the original experience.
- Developed the frontend using Next.js with features like resume upload, scoring dashboard, and history tracking.
- Used Prisma and PostgreSQL to store resume data and support user-based history.
- Deployed the application on Vercel and focused on keeping it simple, fast, and usable for real job applications.

Full Stack Developer · Solve8 IT Services (IT Services Company, Contract) *Jun 2025 – Sep 2025 · Australia*

- Worked on internal business applications to improve existing workflows and make tools easier for daily use.
- Built and updated frontend components using React to improve usability and performance.
- Developed REST APIs using Node.js to support user management and operational workflows.

- Improved backend performance by optimising MongoDB queries and data access patterns.
- Fixed issues in an existing production codebase to improve system stability and reliability.

Full Stack Developer · Qual-T Solutions (Industry Client Project, QUT) *Feb 2025 – May 2025 · Brisbane, QLD*

- Built a full-stack service marketplace to manage workflows between admins, providers, and customers.
- Developed frontend components using React and connected them with backend APIs for smooth user interaction.
- Designed and implemented REST APIs using Node.js with JWT authentication and role-based access control.
- Structured backend modules to support scalability and easier feature updates.
- Delivered the project end-to-end within a fixed timeline from requirements to deployment.

Full Stack Developer · Zcientia Labs (AI/SaaS Startup) *May 2023 – Oct 2023 · Remote (India)*

- Built backend systems for a resume generation platform handling structured user data and workflows.
- Developed REST APIs using Node.js to process and manage document-related operations.
- Improved MongoDB performance by ~25% through schema redesign and indexing.
- Added validation and error handling to improve system reliability.

Full Stack Developer · Be-Practical Tech Solutions (EdTech Company, India) *Jan 2022 – Dec 2022 · Bengaluru, India*

- Built a full-stack e-commerce platform to handle product catalogue, cart, and checkout workflows.
- Developed REST APIs using Node.js and integrated them with frontend components for real-time updates.
- Implemented JWT-based authentication to secure user sessions and data.

PROJECTS

AI Resume Copilot (Live) · *Next.js · Node.js · PostgreSQL. OpenAI*

- Built a tool to analyse resumes against job descriptions and identify missing keywords.
- Used OpenAI to generate improved, ATS-friendly resume content.
- Deployed the application with a simple UI and real-time feedback dashboard.

IoT Cloud Monitoring System · *Node.js · AWS · REST APIs*

- Built a system to process and monitor real-time IoT data.
- Developed backend APIs using Node.js to handle telemetry data.
- Deployed on AWS to support scalable data processing and remote monitoring.

EDUCATION

Master of Information Technology *2024 – 2025*

Queensland University of Technology (QUT) · Brisbane, QLD

Bachelor of Technology *2018 – 2022*

M.S. Ramaiah Institute of Applied Sciences · India
